

CRITICAL CLEANING SOLUTIONS FOR UNITED STATES PHARMACOPEIA (USP)

USP Chapter <797>, Pharmaceutical Compounding: Sterile Preparations, delineates the standards and outlines the required procedures for compounding sterile preparations (CSPs) in all pharmacy settings.

Saturix Surface Cleaning System offers a comprehensive solution that will help any compounding pharmacy be more compliant with USP standards and ensure the clean and sterile preparation of drugs for the safety of patients and employees. It delivers meaningful benefits toward enhancing overall Quality Risk Management (QRM) through an unparalleled cleaning platform to support superior Contamination Control Strategies (CCS) for all surfaces.

SATURIX MOPPING SYSTEM

A patented system engineered to work flawlessly together or alone to reduce risk and waste, promote employee health and safety while improving operational efficiency.

Remove 99.9% of Particles Down to .1 Micron in Size²

Providing critical contamination control performance

Lower Risk Profile of Entire Mopping Process by 80%¹

Eliminating high risk touch points and human process variations

Reduce Chemical Usage by 90%¹

Providing economic and environmental benefits

Reduce VOCs by 60%²

Enhancing employee health and safety

Notes

1. Based on internal analysis of 5,000 ft² ISO 7 facility.
2. Based on third party lab testing.

SATURIX ICT+ ISOLATOR CLEANING TOOL

An innovative solution for systematic and hygienic cleaning of laminar airflow work bench, biosafety cabinets and other PEC (Primary Engineering Controls). It offers a higher level of safety and efficiency.

Touch-Free Pad Application and Removal

Reducing cross contamination risk while increasing efficiency

Ergonomic, Easy-to-Use Hybrid Design

Maximizing coverage and reach

99.9% Particulate Residue Removal²

Providing critical contamination control performance

SATURIX PRE-SATURATED WIPES

Our family of presaturated offers convenience, consistency and cleanliness to help you reinforce USP standards.

Reduces Airborne VOC's

Provides Consistency in Application of IPA

Variety of Substrates for Different Critical Environments

Microfiber Wipes Proven to Remove 99.9% of Particulate Residue, Down to .1 Micron in Size

Saturix is a complete system for critical cleaning featuring innovative carts, mops and wipes backed by 100 years of cleaning experience. With focused product selection, it's easy to find exactly what you need right now.

SATURIX IPA

Fast-acting with extremely chemical residue, our sterile IPA is manufactured and packaged in cleanrooms according to the highest GMP ISO 9001 standards.

70% USP Grade Isopropyl Alcohol and 30% Water for Injection (WFI) Quality

Alcohol Blend Filtered to 0.1 Microns

Gamma Irradiated and Validated to a Sterility Level of 10⁻⁶

USP<800> provides standards for safety handling of hazardous drugs (HD) to minimize the risk of exposure to healthcare personnel, patients and the environment.

Section 15.3 specifies that cleaning is a process that results in the removal of contaminants (e.g., soil, microbial contamination, HD residue) from objects and surfaces using water, detergents, surfactants, solvents, and/or other chemicals.

Saturix microfiber mops and wipes are proven to remove 99.9% particulate residue down to .1 micron in size. They mechanically remove disinfectant residues and other harmful particulates from the surface to provide additional assurance to any critical environment.

Average Particle Sizes
